DTX Cable Analyzer

Features

- Exceeds specification requirements for cable topology with superior level IV accuracy.
- Three times faster than existing testers with 9 second cat6 auto test
- 2 models to choose from DTX-1200, DTX-1800
- DTX -1800 Tests up to 900MHz future proofing your investment for future applications such as 10 Gigabit Ethernet, Class F using the relevant accessories.
- Optional fibre module lets you switch between copper and fibre with the push of a button.
- Fast, Reliable, and rugged with extended 12-hour battery life and colour display for enhanced user productivity.
- All models can be upgraded to high end performance model
- Optional Gold support warranty extension for exclusive service and technical assistance.

Models

DTX-1200 & DTX-1800

Options & Accessories

DSP-PM06 Set of two Cat 6 Centered Personality Modules for permanent link tests. Use these modules to test Cat6/5e/5 and Cat 3 links.

DTX-PLA002S Set of 2 Permanent Link Adaptors for Cat6A and Alien Crosstalk testing. This adapter can be used for all permanent link tests Cat6A/6/5e/5 and Cat 3.

DTX-MFM (Multimode) 850 & 1300nm Fibre Module See website for technical specifications

DTX-GFM (Gigabit Multimode) 850&1310nm See website for technical specifications

DTX-SFM (Singlemode) 1310& 1550nm See website for technical specifications.

For all other Fluke Products please visit them at www.flukenetworks.com

Fluke Compact OTDR

75

Fluke Compact OTDR

Fluke Networks' new Compact OTDR module is the latest enhancement to the DTX CableAnalyzer, a revolutionary test platform. In addition to performing copper certification and diagnostics, your team can become fibre test experts when you decide to grow your business and turn your cable tester into an OTDR. This full featured, compact OTDR module snaps onto a DTX CableAnalyzer and provides unmatched ease of use for premises fibre testing. Choose a kit that includes a DTX mainframe and smart remote, options for copper certification, optical loss/length capability, or order a module and software that can be installed on your own DTX CableAnalyzer.

Features

- Turn your cable tester into an OTDR. DTX CableAnalyzer – one revolutionary test platform for both copper and fibre testing
- Test and troubleshoot fibre like an expert with easy to use DTX Compact OTDR
- Shoot OTDR traces on singlemode and multimode links at 850nm, 1300nm, 1310nm, 1550
- Perform basic loss/length certification & extended (OTDR trace) certification with one powerful cable tester.

Fluke Fibre Connection

76

Fluke CableQ Qualification

CableQ is the first qualification tool designed for network technicians who need to troubleshoot connectivity problems and qualify cabling bandwidth. It gives network techs the vision to see whether an existing cabling link is qualified to support 10/100, VoIP or Gigabit Ethernet.

Fluke 10gig Solution

The DTX 10gig over Copper Test Solution enables testing and certification of twisted pair cabling for 10 Gigabit Ethernet deployments – whether it is an existing Cat6 or newly installed Augmented Cat6 cabling systems

- The only solution that is fully compliant with industry standards
- DTX 10 Gig Copper Kit together with DTX-1800 delivers on the promise of a future-proof investments – measuring performance for 10 Gig and Alien Crosstalk (ANEXT AND AFEXT) in full compliance with the industry standards to 500MHz.

Fluke Link Runner Pro

LinkRunner Pro enables technicians to resolve a broader range of today's connectivity problems. Unlike traditional 10/100 link testers, LinkRunner Pro verifies Gigabit link – increasingly important for today's high performance networks.

Fluke Fibre Connection Cleaning Kit

Fluke FT525 Fibre Cleaning Kit

77

Fluke Fibre Test & Inspection Kit FT525

Fluke Networks FT 525 Fibre Inspector™ Mini is used to examine installed fibre terminations or ensure terminations are smooth and clean. Using this helps avoid the #1 cause of cause of fibre link failure: dirty end-faces.

Dirt, dust and other contaminant's are the enemy of high-speed data transmission over optical fibre. Today's network applications require more bandwidth, making loss budgets tighter than ever. It is critical that all optical connections are clean and free of contaminant's to ensure application success.

Part No. FT525

Tone and Probe Kit and Digital Multimeter

78

Tone and Probe Kit (Oscillator)

Used for installing or troubleshooting telephone/data/security/audio/visual and electrical. When it comes to wire identification, there's no better tool to have than the 701K Classic Tone & Probe Kit, from the world's largest manufacturer of tone & probe kits! This popular tone & probe kit is used by technicians everywhere to identify single conductors or cables within a bundle at a cross-connect point, or at remote ends.

Part No. 701K

A full range of other oscillators can be found at www.tempo-textron.com

Digital Multimeter

- Multi-purpose meter for most electrical needs. Includes elastomer boot to protect meter from damage. AC/DC voltage, DC amperage measurement. Temperature measurement. Audible continuity and diode tests. Tests 1.5V and 9V batteries. Lifetime Limited Warranty.

Specification.

Voltage measurement: AC V: 200.0, 600 V; DC V: 200.0, 2000 mV; 20.00, 200.0, 600V Amperage Measurement: DC A: 20.00, 200.0 mA
 Temperature measurement: -40 to 1832 F, (-40 to 1000 C) Measurement Category: CAT III, 300V; CAT II, 600V

Part No.
DM-40

A Full extensive Range of Multimeters is available from Greenlee visit www.mygreenlee.com

Description
Ideal Volt Sensor
Audible test
Part No. 61-063

ISDN Test Set and Butt-in Telephone Test Set

Next Generation Harrier ISDN Test Set

The NG Harrier is a two part test system that overcomes the complexity associated with installing commissioning and maintaining ISDN circuits. The PC software component commands the hand held test instrument to comprehensively tests and ISDN installation and store the results.

The inherent capability of the PC is used to display Web Page information on the tests and how they relate to the ISDN service to virtually eliminate the need for training. The hand held component can operate independently of the PC to allow quick verification of the U-Interface, S/T-Interface, and derived POTS interface.

Optional components include Passive Monitor to trace the D-Channel activity of connected Terminal Terminal Equipment, Protocol Analyzer to decode the D-channel protocol, NT Mode to emulate the network and So Test adapter to test the S-Bus wiring

Part No. NGHarrier

LANCASTER

The LanCaster is a professional Structured Cabling Tester and Trouble Shooter designed to speed up the on-site testing of data and voice networks, and the production testing of cable assemblies. The LanCaster identifies all common faults, including split pairs, on wiring schemes installed to TIA568 A/B, USOC and ISDN standards. In addition to this the LanCaster can inform the user which end of the installed link contains certain types of fault, enabling rapid location and correction.

Features

- Traffic alert indicator
- Indicates active services i.e. 10mbits, 100mbits which prevents testing a live link
- Measures length of cable under test.
- Built in tone generator which can be used in conjunction with the probe of any oscillator.

Part No. Lancaster - Lancaster-prost (Stores 1000 Test Results)

DSTS 2 Butt-in Telephone Set

The DSTS 2 is an ideal low-cost butt-in telephone with all the essential features. Selected by Network Operators and Customer Equipment Installers around the world for its reliability and ease of operation.

- High Impact Case
- Ground Start/Earth Calling
- Tone/Pulse Operation
- Timed Break Recall
- Polarity Check
- Sounder
- Unlimited Line Voltage Protection
- Belt Clip/Hanging Loop
- High Impedance Monitor
- High Clarity Microphone

Part No. MOO28/34

Electronic Devices

80

Walkie Talkie Cobra MT600

from Cobra offers you a reliable set of walkie talkies with rechargeable batteries for all your testing requirements on site no more need and expense of Mobile phones. Up to 5km Range (terrain dependent). Every technicians must have.

Part No.
ITT44831

Omega Sun Visor Handsfree with Caller Name Display Phonebook

Product Description

The Pama Omega Sun Visor Handsfree represents the state-of-the-art in removable in-car units. The handsfree is programmable from your SIM so when a caller rings, it displays the name from your phonebook. This small, portable device clips conveniently onto the sun visor in your car and once paired to a Bluetooth device provides a safe handsfree system. Get the point and not the points and drive safely.

Part No. Omega

Sat Nav.

The Mio C220 is simple, straightforward, and easy to use. It sets the standard of what the basic navigation system should offer: latest Tele Atlas maps, speed camera alerts, points of interest, pedestrian mode, touch screen, voice guidance, TMC compatibility (TMC Receiver sold separately) and many other features.

Part No.
C220

For more information please contact our sales office@01-4264000

Cable Performance Tester and Multimedia Cable Tester

SIGNALTEK is the most cost-effective Gigabit Ethernet cable performance tester. It tests the links ability to support applications by transmitting Ethernet packets on the link and measuring performance in according to the IEEE 802.3ab gigabit Ethernet standard, the ultimate performance indicator for any network.

- Provides comprehensive cable testing for Voice, data, and video applications.
- Performs complete wiremap and length tests.
- Performs a full IEEE 802.3ab compliant gigabit Ethernet packet test in about 35 seconds
- Includes a TDR(Time domain Reflectometer) for accurate length measurements and to aide in locating cabling faults by providing distance to short/open information
- IP Pinging can be used to verify the communication of many devices.
- Supports static and dynamic (DHCP) IP configuration.
- Stores 20,000 tests internally
- Prints easy to read pass/fail qualification reports.

Also there is a version which can test fibre optic links along with all the above features

Part No.
Signaltek

VDV Multimedia Cable Tester

The VDV Multimedia cable tester is an easy-to-use cable testing and verification device that can quickly test all wiring requirements found throughout today's residential and commercial environments.

- Voice –Test 3 pair USOC and 6 position RJ11/12 jacks for voice cable testing
- Data tests both shielded and unshielded cable testing to 568A/B RJ45
- Video-Test coax for opens and shorts with F-Connector Interface.
- Easy to read LCD display with "PASS" or "Miswire" indicator for each test.
- Tone Generator supports 4 different tones making fault isolation easier.
- Identifies voltages on cables.

Part No.
33-856

UTP/STP Cable Testers & Lantek Cat 5e CAT 6A Tester

Quintest UTP/STP Cable Tester

The Quintest is a simple to use Structured Cabling tester featuring a continually sequencing green/red LED display on both main and Remote Units. It can test UTP and STP Patch cables as well as installed wiring. Wire Map and cable faults, including short circuits pairs, open circuit pairs, short between pairs, pair reversals, transposed pairs and other cable miswires are indicated.

Every technician should have one.

Part No.
QUINTEST

LANTEK 6a 500MHz Lan Cable Certifier

Features

- Is capable of certifying CAT6a installations.
- The unit is fully compliant with ISO Class Ea and Eia/Tia CAT6a standards.
- Can accurately test 10 Gigabit Ethernet (10GBASE-T) networks to assure that they meet the transmission of IEEE 802.3an.
- Allows standard patch cords to be used for link testing
- 20 second testing on Cat6 and 22 Seconds on Cat6a
- Can test fibre link also with the fibretek and tracetek modules.

The Lantek 6a is fully upgradeable to Lantek 7 a 600mhz tester Contact our sales office for further information on this.

Ideal have a range of Cat7 Testers Available also

Description

Lantek 6a Basic Pack
Lantek 6a Premier Pack

Part No.

Lantek/6AB
Lantek/6AP

The premier includes hand carry case, PCMCIA adapter, 64mbit compact flash, USB Port, Flash reader for PC & 4 Rechargeable Nimh Batteries & Office battery charger. For further details on these units visit www.idealindustries.co.uk
